"IF YOU'RE IN THE LUBE BUSINESS, THIS IS A NECESSITY."

APPROVED DEALER EQUIPMENT

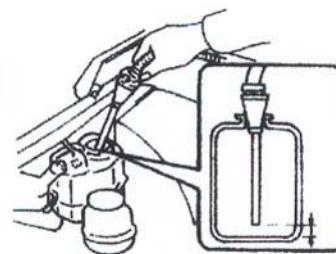

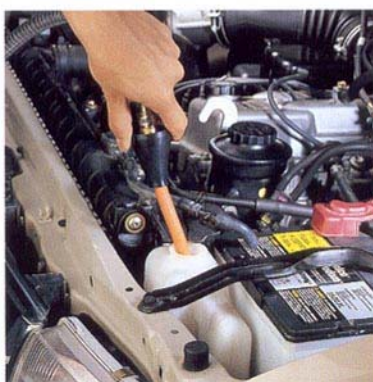

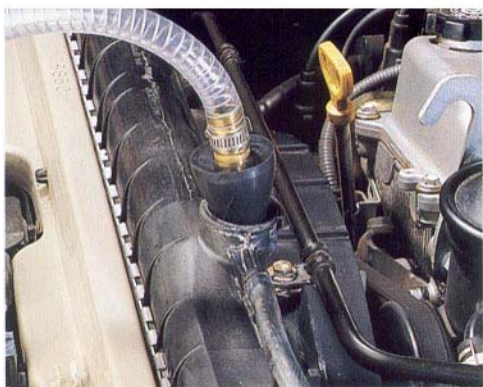

IT ONLY TAKES ABOUT 3 MINUTES FOR THE COOLANT CHANGER TO EXCHANGE THE NEW COOLANT FOR THE OLD!

FEATURES:

- ENVIRONMENTALLY SAFE
- EASY TO USE
- EFFICIENT
- THE WHOLE PROCESS TAKES PLACE AT THE RADIATOR SPOUT
- WILL NOT CREATE AIR POCKETS
- TIME SAVER
- SPACE SAVER
- SEE-THROUGH CYLINDERS AND HOSES MAKE THE PROCESS EASIER AND ALLOWS VISUAL EVIDENCE OF HOW DIRTY THE COOLANT IS

This unique machine is: efficient, reliable, and easy to use!

How it Works

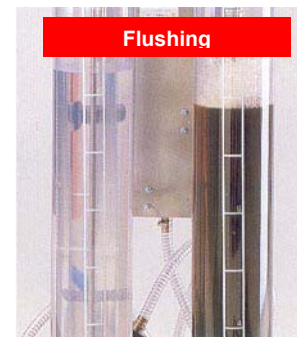

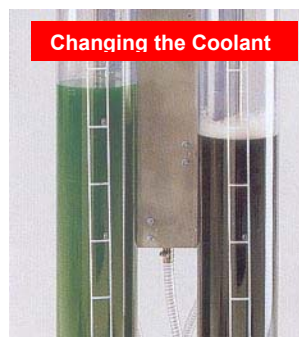

Connect the cone plug directly to the radiator spout or use an attachment for access through the reservoir tank.

Are you in the lube business? Are you tired of so-called coolant exchanging machines that are bulky and take a long time? How about flush and fill kits that leave a mess on the ground? Cutting into heater hoses or removing the bottom radiator hose is certainly not exciting or efficient.

With the Palm Crest's line of coolant changers, your problems are solved. Our coolant changers use patented vacuum technology to extract the old coolant directly from the radiator spout (or the reservoir tank). The whole process is simple, easy, clean, environmentally safe and most importantly, efficient. It operates using only compressed/shop air.

Once the suction process is complete, a negative vacuum is created within the radiator and cooling system. Simply open the valve to the new coolant tank and the same amount of old coolant that was extracted will automatically fill into the radiator and cooling system with new coolant without creating air pockets. The whole process takes an average of 5 minutes and is easy to monitor because the cylinders that store both the new and old coolant and all of the hoses are clear.

MODEL	LC-2B
AIR PRESSURE	71 PSI
WEIGHT	55 LBS
DIMENSIONS	49 X 17 X10 IN.
CYL. DIAMETER	5.1 IN.
MAX. CAPACITY	12.8 QTS/CYL.

U.S. Patent No. 5,573,045 & 5,615,716 and other World Patents

7625 Hayvenhurst Ave. Unit 40
